INFINI-CILS®

FOR THE GROWTH
OF EYELASHES AND EYEBROWS

HIGH TOLERANCE FORMULA
WITHOUT PROSTAGLANDIN OR DERIVED PRODUCTS
0% PARABEN

INFINI-CILS® IS A HIGH-TOLERANCE FORMULA,

without prostaglandin or derived products. This very innovative, unique product is designed to stimulate and prolong the growth of eyelashes and eyebrows with a visible yet natural result.

The originality of INFINI-CILS®, enriched in Silicium and Panthenol, is its double action mode made thanks to the exclusive combination of two active ingredients, a compound of L-Cystine and Gly-His-Lys Biotinyl. They make it possible to activate, stimulate and prolong the life cycle of the eyelashes and eyebrows by increasing the duration of their growth.

Eyelashes are visibly denser and longer whilst new eyelashes are thicker and stronger.

The INFINI-CILS® action mode:

- 1- stimulates and accelerates growth.
- 2- prolongs the life cycle of eyelashes and eyebrows.

For quicker, better effectiveness thanks to the dual application mode:

- 1- at the root of the lashes where you apply with eyeliner end.
- 2- along the eyelashes and eyebrows where you apply with mascara end.

A clinical study has demonstrated the effectiveness and tolerance of the Infini-cils® formula (Eurofins ATS - 28 days on 20 volunteers), excerpts:

- 1- Eyelashes are
 - denser by 50%**
 - more voluminous by 45%**
 - longer by 32%**
 - thicker by 27%**

- 2- INFINI-CILS® offers excellent ocular tolerance.

INSTRUCTIONS FOR USE:

Apply in the morning before make-up or in the evening to cleansed lashes and eyebrows before going to bed.
