CONCEALER PENS - CORRECTING PENS
CORRECT - NEUTRALISE - EVEN OUT
FOR A FLAWLESS COMPLEXION

HAUTE TOLÉRANCE

PARIS

COLOUR
CORRECTION

NEUTRALISING AND CAMOUFLAGING IMPERFECTIONS IS THE FIRST STEP FOR A FLAWLESS COMPLEXION

The principle of these pens is based on colour complementarity. Two complementary colours placed one on top of the other cancel each other out, neutralising imperfections and reviving the complexion.

For example:

Yellow tones cancel out bluish areas such as dark circles and conversely bluish-purple shades minimise yellow-toned complexions. Green minimises red, its complementary colour, which is ideal in the case of redness or rosacea.

Through colour:

The Correcting Pens **neutralise** unsightly coloured areas.

The Concealer Pens **cover** dark circles and minor blemishes.

Both **brighten** areas of shadow and **camouflage** blemishes, taking targeted action to correct and even out the complexion for a flawless result.

These pens have light textures with an ultra-natural finish that let skin breathe.

Enriched with **organic Silicium** to strengthen the skin's structure in the eye contour and weakened areas and prevent skin sagging and also enriched with **Hyaluronic Acid** for its moisturising properties.

CONCEALER PENS

Enriched with finely golden illuminating fillers to restore radiance and blur imperfections.

Natural beige shades composed with a carefully considered yellow-toned pigment content to minimise bluish dark circles in particular.

BEIGE CLAIR

BEIGE

BEIGE FONCÉ

Advice

Choose a slightly lighter shade of concealer than your natural skin tone for bright, radiant eyes.

CORRECTING PENS

ILLUMINATEUR : brings radiance to dull, greyish complexions. Camouflages the signs of tiredness, restoring a fresh, luminous complexion.

Apply to the inner corner of the eye, the brow bone or the nasolabial folds or as needed.

VIOLET : corrects and neutralises yellowish complexions and bilirubin dark circles. Brightens and revives the complexion.

Apply to yellowish areas of the face.

VERT : neutralises and conceals redness and visible small blood vessels

Apply to areas of redness.

Tip

Apply the correcting pen in the colour of your choice to the area to correct then lightly tap with your fingertip to blend it in
