CARE
SOLUTIONS

Ocular dryness is a multi-factor disease of the tears and ocular surface that leads to symptoms of discomfort, visual problems and instability of the tear film.

Ocular dryness increases with age due to the natural ageing of the tear glands.

Symptoms of dry eyes:

- Irritation, itching, discomfort
- Eye fatigue
- Visual problems
- Eye redness
- Wanting to blink the eyes
- Increased sensitivity to wearing contact lenses

UNIFLOW

HYDRATING AND LUBRICATING
EYE DROPS
SENSITIVE - DRY - DEHYDRATED EYES

UNIFLOW lubricates, hydrates and protects sensitive, dry and dehydrated eyes.

- > It restores the aqueous part of the tear film and alleviates the effects related to a reduction in tear secretion thanks to a high concentration in Hyaluronic Acid.
- > It relieves and humidifies the cornea and protects from potential irritation linked to a lack of protection.

Protects

Protects and stabilizes the tear film with regards exogenous factors (wind, dust, dry air, air conditioning...).

Suitable for contact lenses

Eye fatigue

Reduces dryness, eye fatigue and visual problems due to extended use of screens, driving at night, unfavorable lighting.

Relieves

Relieves in the event of itching, burning or grains of sand sensations.

High-tolerance skincare and
make-up for all eyes, even the
most sensitive or weakened
